To:secretary@leo-computers.org.uk 18 Jun at 13:17

I have an operators console unit from one of the Post Office LEO326 machines.

I had the unit removed for me by one of the engineers when the machine was being decommissioned at Bristol Computer Centre.

I would like to hang on to it for the moment but could donate to the society at a later date.

From Paul Kelley

I worked in the Engineering Training Dept Jul 64-Aug 68 - first at Minerva Road and then at Radley House in South Ealing. I began on LEO III (never worked on the 326 or 360) until switching to System 4 in early 65.

I have in my possession a complete set of LEO III logic diagrams and microprograms. In 2013 I began documenting, in extreme detail, how the various subsystems withing LEO III operated. I had available to me the original text of my 1964 notes (and those of others) to assist me. I was intrigued as to whether or not, after 39 years, I could still do it. By way of illustration, attached is a Word doc of my efforts on the Coordinator which I ran by Tony Morgan in Dec 2013. It won't be too meaningful as there are extensive hyperlinked references to the logic diagrams and other documents.

Also attached is an image of my folder structure. I include this in order to point out that EVERYTHING I have has been scanned (1.5gb total) and to draw attention to the **Orig Text folder** which contains all my notes of 1964 vintage for all the LEO III subsystems.

In sum, I think it would be appropriate to have a discussion with someone as to how best to dispose of all the above so as to ensure that it is not lost. Some of it may be redundant as it may already exist in the 'archive'. Given that I am now 80 and the sole carer for my wife, time to indulge oneself in this project is at something of a premium and whether I will be able to finish the project problematical at best. In light of these circumstances I would be happy to send a memory stick with everything on it and take advice on how best to proceed with the hard copy versions.

From Gordon Palmer, Engineer at Ford Aveley, LEOII/4 and LEO Computers

- 1. Hardback folder contains engineering charts for most aspects, including for example *storage unit, magnetic drum information routing, paper tape input, store, card input* etc. of LEO II/14.
- 2. Folder with various flowcharts, charts and diagrams.
- 3. Training course "A" lecture notes general introduction to LEO II, including simplified block schematic of LEO II, general description of LEO II, basic circuits, binary arithmetic etc.
 - 4. Training course "D" lecture notes Computer actions, order code and schedule of registers etc.
- 5. Training course "E" lecture notes -Input & Output drum actually includes lecture notes on punched tape and reading mechanism, Hollerith cards and card feed mechanism etc.
- 6. Training course "F" lecture notes includes Power supplies, Operating control facilities, monitoring, marginal testing etc.
- 7. DVD of 1958 film of LEO II/4. Colour film of various activities including loading cards etc. With excellent commentary by Gordon. Lasts only a few minutes, it is not perfect but only really because of its age. The film work is quite good.

1. I have the complete plans for the Imperial Tobacco installation. for what your father called the most complicated system undertaken by LEO up to that time. I wrote all this myself between late 1956 and early 1957 and it it it is in 2 volumes totalling 340 pages. They include a detailed functional analysis of the job, details of the program suite needed to handle it plus specimens of documents and run time estimates etc. If you delve into the first 100 pages you will see how complex (petty, over elaborate?) the requirements were and numerous discussions with users were needed to elucidate them, often asking the same question on the same or different days until consistency was reached.

You can have these if you wish.

2. A proposal for Dunlop, estimating the cost of an installation, and the procedures needed, to handle sales accounting and stock control for the tyre division.

I wrote this in 1959. I would like to keep it but you can borrow it to copy (about 100 pages) if you wish.)

3.I have my original handwritten letter to Lyons in October 1964 replying to their advert for mathematicians. There is also the reply from TRT in Lyons offering me a job together with a few other letters from LEO Computers dealing with admin arrangements like dates. I was a bit disappointed with these comIng from a small new company like LEO as, having a young family, I was keen to have the security that came from Lyons. I would like to keep my original letter with its reply but please copy them if you wish.

John Daines Collection for transfer to CCH

This is stuff that I've got and had given notional NAHC numbers in anticipation of it going to NAHC. A lot was collected at the 2010 and 2012 reunions. I've also had more stuff since that isn't on this list but which I am sorting out. All this belongs to the Society as far as I'm concerned and I will take it to CCH.

LEO III Users' Manual, 5 volumes June 1963. From Mike Buckley, a. Hardware, b. CLEO, c. Intercode, d. Master Routine and Program Trials System, e. Test programs and utilities

Users Manual Vols 3,4,5. Bob Grazebrook, Leo

The Leo Specification issued by Russ Perrin. 28th April 1964 LEO 326 / 360, LEO III, Electrical features, Delivery and installation arrangements, Spares, Maintenance arrangements, Safety precautions. From Mike Buckley,

Collection from Cyril Lanch:

What I do have is:

a couple of "order/Invoice" forms L/94 from Lyons Bakery (one blank) dated 1960,

a couple of Lector forms for Lyons Cakes dated November 1964

a photo from 1964? in Lyons Mail of E Lenaerts , Dr Pinkerton, TR Thompson and E Kay, marking the switching-off of LEO 1

a double page spread in Lyons Mail dated April 1967 including 3 articles: "the incredible computer....." (celebrating the installation of a LEO 326 in Elms House earlier in the year); "the men who run our computer service" (featuring photos and brief bios of George Stevens, Alan King, Denis Toombs, Norman Beasley, and Brian Bean); and "discarded LEO 11 may now become a TV star"

a double page spread in Lyons Mail dated August 1967, featuring the LEO 111 computer fire an article in the Daily Telegraph on 10 November 2011 titled "The teashop computer" celebrating the 60th anniversary of LEO 1 (includes a short but vey complimentary paragraph re David Caminer's contribution).

• Inventions That Changed the World is a five-part BBC Two documentary series presented by Jeremy Clarkson. First broadcast on 15 January 2004, the programme takes a look at some of the inventions that helped to shape the modern world. The UKTV channel Yesterday frequently repeats this series. However, episodes are edited to 46 minutes to allow for commercials to air in the one-hour time slot. Wikipedia

Donated by un-named Phoenix LEO III Operator

Object/document/collection description (Please continue on another sheet if necessary.) 2 X ring binders- both quite full.

Maroon ring binder with dividing cards: type-written training materials for LEO III operators: setting up magnetic tape decks, input equipment,24 hour clock, anelex printer, output writer, control desk. Chart showing 'The main parts of LEO III', information storage, master routine, arithmetic unit.

Black ring-binder labelled 'Advanced Operating': Computer Centre Training – map of how to get to Charles House. Timetable of Advanced Operating Training course – some pages dated 1/9/1966. Chart showing Post Office LEO 326 and lecture notes. Plan of control desk indicator panel. Test paper with the answers and the marker's comments. Intercode action code summary.

Modern Records Centre, University of Warwick

Transferred to CCCH by Jude Brimmer April 2019

Accessions: 1078 1092 9 boxes Papers of John Aris 1980-2006

John B Aris (1934 - 2010) was an early computer programmer and a founder member of the LEO Foundation/LEO Computer Society.

He joined Lyons from University in 1958 as a programmer and became Sales Manager for English Electric-LEO responsible for government contracts.

In 1985 he became Director of the National Computing Centre in Manchester.

Papers re LEO training courses, NCC Conferences and organisation of the 50 Years of Business Computing Conference; reunions of LEO programmers; press cuttings and articles on LEO and early computing history.

Series Modern Records Centre, University of Warwick
ARI/1 3 boxes Papers of John Aris.
ARI/1/1 1078/1 Papers of John Aris: Box 1

Miscellaneous papers including biographical material; correspondence with Peter Bird about LEO history; draft of book.

File of PC magazines, publicity and news cuttings on early computer software incl. WordPerfect magazine; File on jobs, incl. work at Pilkingtons. Imperial Group Ltd, synopsis of lectures by Deloitte & Co 1977 on tax; loose papers on LEO programming and training courses, 1958-1959;

LEO Handbook for staff 1959; loose papers on Company of Information Technologists, meetings and conferences.

Six cassettes 'Scaling the Peak' including management speakers John Banham and Charles Handy; 3 cassettes of the NCC Conference; 1 cassette 'Taming the IT Dragon' Peter Jay.

ARI/1/2 1078/2 Papers of John Aris: Box 2

File: 50 Years of Business Computing Conference, including printed emails, papers re speakers and press coverage of LEO pioneers.

File on US visits 1979 with manuscript notes; file on LEO Foundation with correspondence, minutes etc. 1996-2002;

File with copy articles by Aris, Pinkerton and others, press cuttings and notes; loose photographs. 1 cassette and 1 CD Rom.

ARI/1/3 1078/3 Papers of John Aris: Box 3

50 Years of Business Computing dinner and conference; minutes of Organisation Committee; papers invited and submitted with copies of papers given; EDSAC, 1999;

Cambridge Computer Laboratory papers.

Series ARI/2 1092 6 boxes John Aris and David Caminer. Deposited 2016 ARI/2/1 1092/1 John Aris/David Caminer: Box 1 1996-2009

File 1 Papers re LEO foundation: includes agenda and minutes of first meeting; Deed of Trust; correspondence, emails and papers re trustees. \r\n

File 2: papers re David Caminer tributes with obituary, copies of Pinkerton lectures, articles.\r\n

File 3: Articles and drafts for Kiev Conference. John Aris 'Animating the Archives' (1990), 'A computer called LEO' review,2003; Looking at the LEO project (in IEEE Annals of the History of Computing, 2000), Inventing Systems Engineering (with draft and amended draft, suggested changes by F.Land), notes for Kiev conference; correspondence; article/speech by Maurice Wilkes; paper by F. Land, paper by Caminer; article by Caminer in The Computer Journal, 1997; manuscript notes.

File 4: Articles, correspondence and obituaries of LEO pioneers including Leo Fantl, notices of death of Sam Waters, transcript of interview with J.Pinkerton by Chris Evans of NPL; copy of Strategy, Sep 1999 with article on Lyons and LEO project.

File 5: Computer Conservation Society events including '50 years of computer payroll' seminar and celebration at Science Museum (Feb 2004), press releases and minutes of meeting, Jun 2003. Booklet 'Tradition meets Technology', Worshipful Company of Information Technologists. Pamphlet on history of computing.

ARI/2/2 1092/2 John Aris/David Caminer: Box 2 1995-2000

File 1: Correspondence, notes and papers re history of LEO and publication of the book.

Papers by Aris, Caminer and others; correspondence with pioneers, recollections etc. Book first published as 'User-Driven Innovation: The World's First Business Computer' later retitled LEO: The Incredible Story of the World's First Business Computer.

File 2: Photocopy of diary/report of Aris's tour of USA in 1963; correspondence and emails; copy of Computer Bulletin, Jun 1991; review of Leo publication; Some Practical Steps in Advanced Management in Government - report on use of technology in government.

File 3: General file of correspondence, articles, newspaper cuttings, LEO Society papers; the National Computing Centre annual report 1996-1997; presentation papers; talks and speeches.

ARI/2/3 1092/3 John Aris/David Caminer: Box 3

File 1: David T Caminer: Review of ICL Spares, initial report Oct 1980; ICL Spares Kitting Policy and Procedures Jan 1981; provisioning and repair of PCBS, Jan 1981;

File 2: Mergers and take-overs. Press announcement- ICL and Fujitsu announce major collaboration in mainframe computers, Oct 1981; agreement between ICL and Fujitsu questions and answers; press cuttings; letter and statement from Gordon Brown MP re sell off of Britain's entire main frame computer industry and Labour opposition, 1990; correspondence and speeches re take-over, article 'Farewell to Britain's computer industry'; papers for STC plc AGM with proposals to shareholders re ICL and Northern Telecom (Nortel);

File 3: Correspondence, memoranda and reports on earliest LEO jobs and functions, inc's symposium on automatic digital computing 1952-1953, diagrams and tables;

File 4: Memoranda re original Lyons bakery pay roll, Dec 1953

File 5: Three editions of journals -Annals of History of Computing (1998, 2000, 2001) with article 'Looking at the LEO project' (Jul-Sep 2000); papers re Manchester NAHC; press cuttings and record of decisions at 89th conference of Labour Party, 1990

File 6: Offprints from publisher: Reviews of 'A Computer called LEO' in International Journal of Information Management 24(2004); article 'Animating the Archives' by John Aris (Aslib annual lecture, 1989); article 'LEO and the computer revolution' DT Caminer in Journal of Strategic Information Systems 12 (2003) and Preface.

ARI/2/4 1092/4 David Caminer : Box 4

File 1: Articles by Caminer and from journals inc. The ICL merger - a reappraisal by Martin Campbell-Kelly, University of Warwick; some notes on LEO's eclipse; LEO and It's Applications by Caminer, 1997; '- and how to avoid them' article in The Computer Journal 1958; How to Choose a Computer by Caminer (Sales Manager English Electric-LEO-Marconi Computers Ltd) 1966;

File 2: Press releases, personal papers and reminiscences: Maurice Wilkes 'Early Digital Computer Developments in England'; press releases re Post Office purchase of five computers, 1964; notes on LEO, 1971; Lyons Clerical Office 'Bulletin' Sep 1958 with note on payroll at back; article in Business History, Jan 1987; LEO III Commissioning - People and Memories; work record of David Caminer; correspondence and autobiographical notes of John Bennett; copy articles.

File 3: LEO Chronicle - developments arranged by year from 1947.

File 4: Full report by T Raymond Thompson of his visit to the USA in 1947 (typescript copy); report on computer structures (unknown author), c.1994.

File 5: Notes for a lecture; notes on papers presented by LEO Computers Ltd at summer school, 1955; notes for an interview of David Caminer OBE for the IMIS; prints from websites and archive descriptions from Manchester NAHC

File 6: LEO documentation: brochure on LEO Document Reader with photographs, 1962; booklet 'LEO the Automatic Office that revolutionised the whole conception of office practice'; booklet 'Lyons of London'; LEO - Equipment Costs of large scale LEO IIC Installations; reprint of article LEO III, 1962; papers on model job - LEO III training course 'Batting Averages Specification'; newspaper - ICL supplement on The Luxembourg Project - providing for the computer needs of the EEC, 1979.

ARI/2/5 1092/5 David Caminer : Box 5

File 1: Correspondence, papers, invitations etc re publication of 'User Driven Innovation'; Marketing Plan. 1995-1998

File 2: Bakery Valuation Job papers inc reports on job and technical data Oct 1951- Jan 1952; correspondence and notes on valuation job.

File 3: Fragile paper: correspondence and memoranda leading to LEO II, 1955.

File 4: Articles and talks on early computers; inaugural John Pinkerton lecture by Prof. Sir Maurice Wilkes, 2000; general articles on early systems; newspaper cutting 'Colossus is re-born' Financial Times, 1996; ENIAC and After by Caminer; booklet 'The Birth of the Baby' University of Manchester; article by John Hendry on LEO and correspondence with Caminer, 1986

File 5: Caminer's Lecture notes at Cambridge inc. summer school and other teaching, 1955-1968; article M File 6: Visits to America. LEO booklet - summary of visits made by Caminer and Pinkerton, Mar 1958; Mik photocopy of notes of visit in 1947.

ARI/2/6 1092/6 David Caminer : Box 6

File 1: Book reviews and articles on LEO publications.

File 2: Memoranda, correspondence and technical papers re LEO; report re demonstration of LEO 1955; meeting at Corby 1971; copy of keynote speech by Sir Kenneth Corfield at Inst. of Chartered Accountants, Jul 1985; report on Royal Statistical Society meeting 1956;

File 3: Articles and papers: The application of electronic digital computers and calculators to accountancy, costing and managerial control - notes presented by Leo Computers Ltd, 1955; copy of The Manager with photograph of John Simmons on front cover and article 'LEO or Electronics in Tomorrow's Office', a recorded discussion including Pinkerton, Simmons, T.R Thompson and others; article 'LEO' by Pinkerton, 1954; copy of journal 'Data Processing' Nov/Dec 1964; copy of Lyons Office journal, Mar 1956 with photograph of T.R.Thompson; article by Thompson, 1954; offprint of article 'How LEO works', 1954; ICL System 4 Information Manual, n.d.; A few facts about LEO Service Bureaux; English Electric Leo Marconi System 4-70 booklet; 'Electronics in Local and Public Authority Accountancy' booklet; programme for First Conference of British Computer Society Ltd, Cambridge, Jun 1959; LEO III folder. \r\n

File 4: Correspondence and reviews for 'User Driven Innovation', 1996-1997

File 5: Letters and notes re LEO publications incl. interview with Caminer 1996

From Martin Booth

Dear all,

Today I received from Martin Booth (CC'ed) a LEO I short delay line.

I will bring it to the CCH tomorrow.

<u>Donated by Jon</u>, LEO 326 Operator at Post Office Copies held by Frank Land

On Wednesday, 26 June 2019, 15:08, Jon <jonsabuzz@zoho.com > wrote:

Attached are some photos/PDF documents of some LEO memorabilia. I worked as an operator in the Post Office/British Telecom DPE Edinburgh computer centre and worked as an operator on the LEO 326 between the years 1976 - 1981

There are 2 sheets that was taken from some DPE (Post Office Data Processing Executive) training. It lists the development of the DPE over the years.

There are 3 sheets taken from the DPE magazine 'Database'. It has 3 photos and some text about the closure of the Derby computer centre and other related letters. I have duplicated the copies in PDF and JPEG.

There are 2 photos of a commemorative tie that we got when the Edinburgh computer centre closed down, I think we had to pay for them.

Martin wishes to loan it to the Society. He made clear that if (or when) it will not be needed he would like to have it back.

Please Martin correct me if I am wrong. Anyway, I leave you the bureaucracy. I am a humble courier.

Best wishes,

Elisabetta

PS. You might receive a duplicate of this message (different pic attached) which is stuck in my outbox.

Delivered to CCH Jude Brimmer by Peter Byford 9.08.2019

- 1. Bletchley Park lectures LEO the first Business Computer by Alan King 20th January 2005
- 2-4. 3 DVDs labelled London Home movies episode 4 Granada TV LEO this included interviews with David Caminer and Peter Byford effectively doing a commentary with the LEO (1958 film)and a short sequence of LEO III film introduced by Brian Eaton. Another DVD includes some video of Manchester computer (Baby?), Colossus and John Page (LEO engineer) talking about LEO.
- 5. LEO III/1 (Hartree House mid-sixties 2min 22 secs by Colin Browning
- 6. LEO people interviews by *Over the pond* film company on behalf of Google Nov 2011 used for the Pioneers film. 2 dvds Original filming and edited version (by Peter B).

From Emil Gottwald

Re: "CLEO programme listing" - I'm not sure if this qualifies, or is of any interest, but I have a binder of course material and associated notes from a CLEO class I attended in April 1965 that was taught in Radley House by G.G. Hanmore, J.D. Wilkinson, D.C. Preece, R.T.A. Penney, and E.M. Hale.

The material includes CLEO programmes used in class exercises. Let me know if this might be of any use...
